

Add a nominee to your crypto.

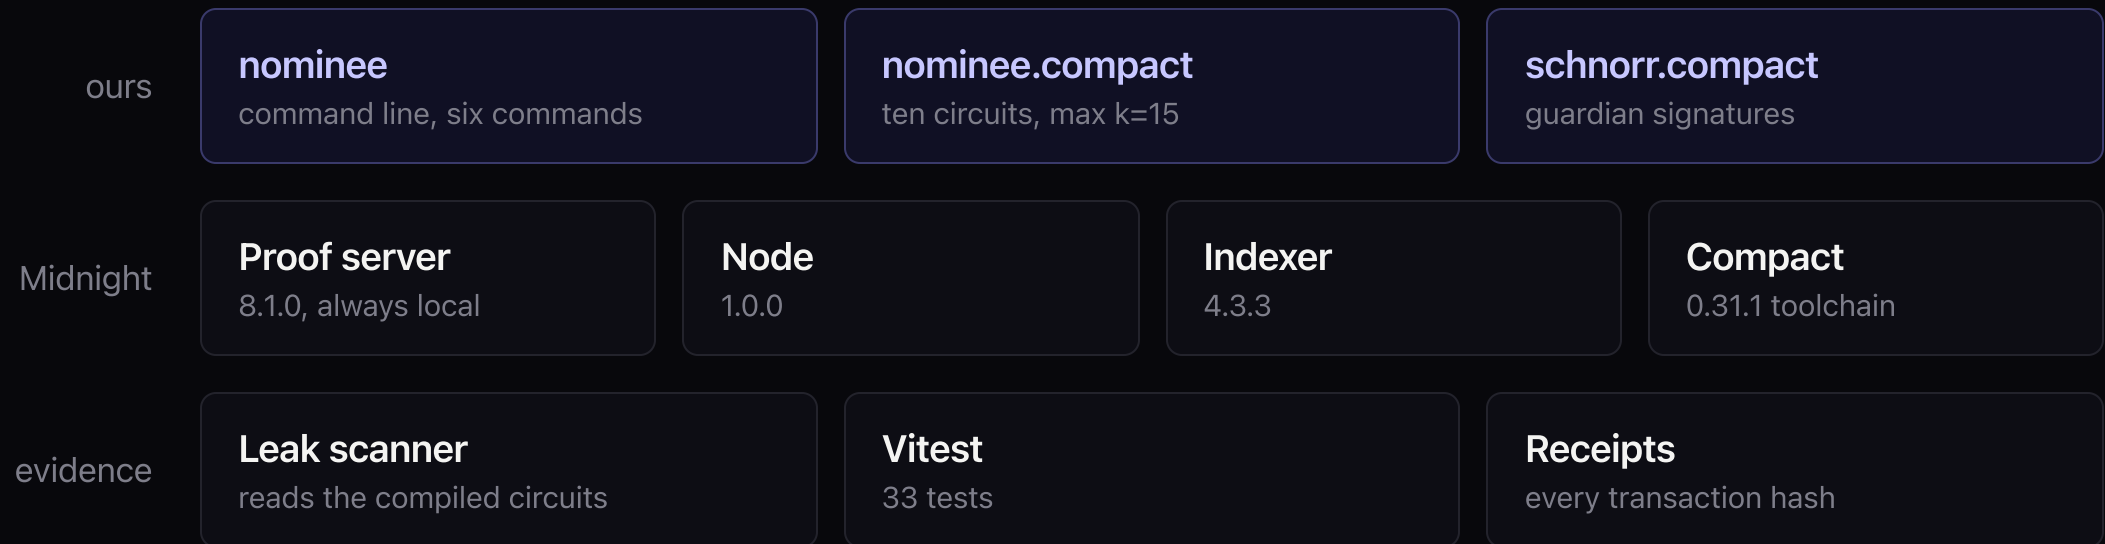

Nobody learns who.

\$68.7B

in Bitcoin is permanently lost. A lot of it belonged to people who died.

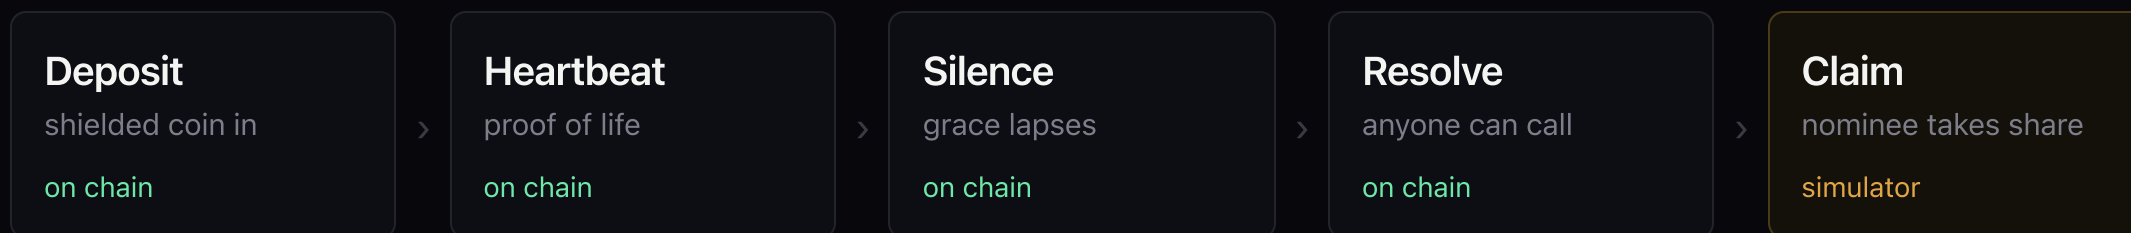

**Your bank account has a nominee field.
Your wallet does not.**

How it is put together

Two commands from a fresh clone, no toolchain to install.

What the demo does

Nine transactions landed on a real node. We tried three ways to steal from it and the contract refused all three. Nothing secret ever reached public state.

Money goes in on chain. Money coming out is the one piece still to land.
