

Add a nominee to your crypto.

Nobody learns who.

\$68.7B

in Bitcoin is permanently lost. A lot of it belonged to people who died.

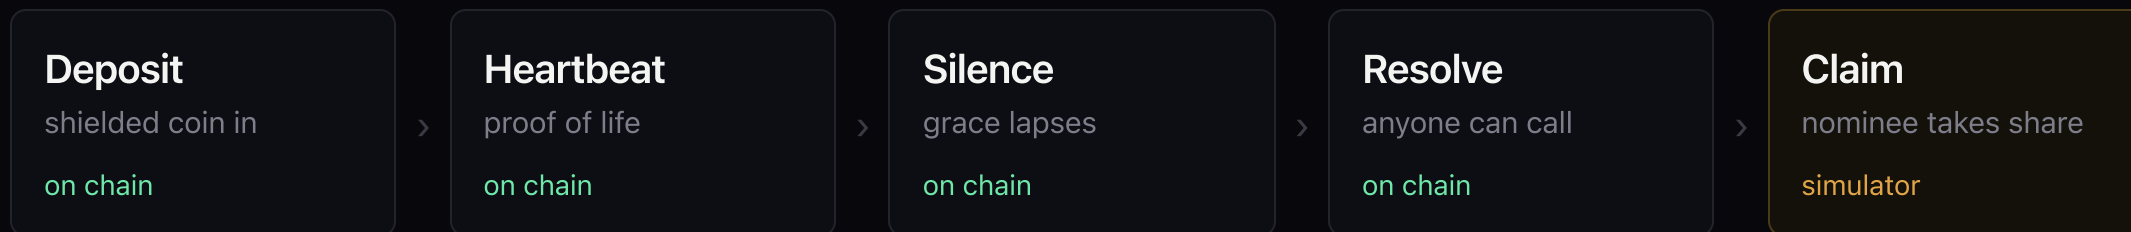

**Your bank account has a nominee field.
Your wallet does not.**

What the demo runs on

ours	nominee command line, six commands	nominee.compact ten circuits, max k=15	schnorr.compact guardian signatures	
Midnight	Proof server 8.1.0, always local	Node 1.0.0	Indexer 4.3.3	Compact 0.31.1 toolchain
evidence	Leak scanner reads the compiled circuits	Vitest 33 tests	Receipts every transaction hash	

Two commands from a fresh clone, no toolchain to install.

What the demo does

9

transactions accepted
on a real node

3

attacks tried,
all refused

0

secrets reaching
public state

Money goes in on chain. Money coming out is the one piece still to land.
