

Add a nominee to your crypto.

Nobody learns who.

\$68.7B

in Bitcoin is permanently lost. A lot of it belonged to people who died.

**Your bank account has a nominee field.
Your wallet does not.**

Every fix on offer makes you pick one: tell a company who inherits, or tell everyone.

	REVEALS THE NOMINEE	TRUSTS A COMPANY
Sarcophagus	Yes	No
Bitcoin timelock	Yes — at spend	No
Casa	No	Yes
Coinbase	Yes	Yes
Nominee	No	No

Deposit, name your nominees, check in now and then. Stop checking in and the vault opens — each nominee proves membership and takes their share.

The chain sees: a vault exists · a heartbeat stopped · N anonymous claims.

WHAT'S ACTUALLY BUILT

Compact circuits, compiled on 0.31.1	10 · max k=15 · 97,628 rows
Live on-chain transactions	9 accepted
Shielded deposit	works on a real node
Unshielded deposit — the control	rejected, same block window
Simulator tests	33 passing
ZKIR privacy scan	no secret reaches public state

Payout is not live yet. Deposit is. We know exactly why, it's written down, and it's the first thing in Wave 2.

```
git clone github.com/vwakesahu/nominee && ./run-devnet.sh
```
