

Add a nominee to your crypto.

Nobody learns who.

\$68.7B

in Bitcoin is permanently lost. A lot of it belonged to people who died.

**Your bank account has a nominee field.
Your wallet does not.**

Sarcophagus

Publishes who inherits, when, and every time you check in.

Bitcoin timelock

Hides it until they claim. Then the script tells everyone.

Casa, Coinbase

Keeps it quiet by telling a company instead.

Nominee tells nobody.

Deposit, name your nominees, check in now and then. Stop checking in and the vault opens. Each nominee proves they belong and takes their share.

the chain sees: a vault exists · a heartbeat stopped · N anonymous claims

public state

Payout is not live yet. Deposit is.

We know exactly why, it is written down in the repo, and it is the first thing we fix.

```
git clone github.com/vwakesahu/nominee && ./run-devnet.sh
```
